

Obedience Training

Obedience training is an important part of your dog's care and well being. You have a choice of how to train your dog. You may choose to either train the dog yourself or train with the help of professionals.

Professional obedience schools or classes help you learn effective training methods. They also give you and your dog a regular time and place to work on communication, training and socialization. You may find it helpful to visit the different schools to meet the instructors and observe the classes in action.

Below is a list of obedience professionals in our area. Our clients, who found their expertise helpful, have highly recommended them. If you choose to train your dog on your own, we have included a list of books and tapes that contain helpful information.
